DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-8 and 10-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite when “n” is 2. In the formula, applicant indicates a specific point of attachment for substituents NHR_1 and S-R_2 . It is not clear where the point of attachment could be for the nitrogen and sulfur atoms when n is 2.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002

Art Unit: 1714

do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 and 10-12 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over WO 02/42262.

WO 02/42262 teaches the present compounds as anti-degradants in vulcanized rubber, including natural rubber, polybutadiene rubber and copolymers of polybutadiene. The antidegradants are used in an amount ranging from 0.1 to 5.0 parts per hundred, which overlaps with applicant's 0.5 to 10.0 %. Conventional additives such as vulcanization activators may also be utilized in the composition. Patentee's comparative data indicates that the antidegradants are combined with the rubber and cured at 150 degrees C., which is greater than the softening point of rubber and is sufficient to achieve maximum torque. See page 7, line 11 through page 8, line 30 and page 12, line 26 through page 13, line 24. Also see pages 20-22. The present invention is clearly met by the reference. Since the World patentee does not limit the alkyl substituents

Art Unit: 1714

present on the antidegradants, such alkyl moieties as t-nonyl or t-dodecyl are encompassed by the patented disclosure.
